SHORT DESCRIPTION

OX-ON Magnum Flex Lanyard Supreme 1.9 meter fall arrester line was tested on users between 50 and 150 kg. Used for e.g. scaffolding work. Rope in 35 mm polyester tubular webbing with integrated energy absorber. The energy absorber gradually reduces the energy in the event of a fall, so that the braking does not become too abrupt. The fall arrester line also has an integrated strap for rescue, which is triggered in the event of a fall. Large, user-friendly, aluminum scaffolding hook with a 60 mm opening at one end and aluminum twist-lock hook with a 22 mm opening at the other end to ensure quick and easy operation. The anchorage point should, if possible, be above head height to reduce the ground clearance.
