**SHORT DESCRIPTION**

OX-ON Maverick Absorbing Lanyard Supreme 2 m is an edge-tested energy absorbing lanyard of 2 metres that you can use in connection with e.g. scaffolding work and in places where there are sharp edges. The lanyard is made of extremely strong 45 mm elastic tubular webbing with integrated energy absorber. At a fall, the energy absorber gradually reduces the energy to avoid a too abrupt slowdown. OX-ON Maverick Absorbing Lanyard Supreme is sharp edge-tested, and it has a working length of up to 2 metres. It is provided with a steel screw gate carabine with an 18 mm opening and a snap hook with an 18 mm opening, which ensures you quick and easy operation. If possible, the anchorage point must be above head height in order to reduce the vertical clearance. You should notice that the vertical clearance at any time must be calculated before starting work with the fall protection. For further information on required vertical clearance, please read the attached user manual or contact OX-ON.
