SHORT DESCRIPTION

OX-ON Mask FFP2NR D w/Valve Comfort is the safety approved filtrating single-use mask with valve, which you can use when working with hazardous dry particles and liquid aerosols with a Workplace Exposure Limit (WEL) <5 mg/m³ (max. concentration 10 x WEL).

You can for example use the disposable mask when you are grinding wood, metal, stone and plastic, and also when working with lead/copper-free paint as well as water-based colour spray paint.

The mask is dolomite tested, which means that you get a filter with a particularly large dust capacity with slowly increasing resistance. At the same time, this quality mask is provided with a valve, which ensures you great comfort and a pleasant climate in the mask when you use it. The valve helps to prevent the accumulation of moisture and heat when wearing it.
