

Product Main Number 1000013190

**Disposable glove, THOR Ultra Grip Long, M, dark blue, nitrile, Fish scale-textured, powder-free**

- ✓ Gives you a good, steady grip
- ✓ Elastic and flexible material
- ✓ Fit snugly to the hand
- ✓ Contain no latex proteins

**Product Description**

THOR Ultra Grip Long is a specially developed nitrile glove with unique properties, not least great strength and a very good grip. This disposable glove also has a great fit thanks to its elastic structure. The glove contains no latex proteins, and is therefore safe to use, even for people with latex allergy. Available in different sizes.

**Specifications**

Base name	Disposable glove
Brand	THOR
Sub-Brand	Ultra Grip Long
Size	M
Secondary color	Dark blue
Properties	Rolled cuff
Features	Fish scale-textured, powder-free
Single or multiple use	Single use
Material	Nitrile
Length/depth	300 mm
Width	95 mm
Weight, net	9.7 g
Thickness	Min. 0,15 mm
Certificates	CE. Food contact materials. CAT III.
CE Category (Personal Protective Equipment)	CAT III
Product or test standards	EN ISO 374-1:2016 Type B KPT, EN 374-4:2013, EN 374-5:2016, EN 16523, EN 374-2, EN 420, AQL 1.5
Directives, regulations and acts	(EC) No 1935/2004, (EC) No 2023/2006, (EU) 2016/425, BEK nr 681 af 25/05/2020
Shelf Life	5 years
Storage Instructions	Store dry, room temperature and no direct sunlight.
Product Disposal Instructions	Can be disposed of with normal household waste sorted according to local regulations.
Packaging Disposal Instructions	Can be recycled or incinerated.

The CE mark guarantees that a product is safe to use and complies with all safety precautions. CE stands for Conformité Européenne (European Conformity) and is mainly found on electronic equipment, safety equipment, construction products and medical equipment.

Third-party type approval is required for all Category III personal protective equipment (PPE) products. The showing of the CE logo for chemical protective gloves requires that tests are carried out in accordance with test standards specified in EN ISO 374-1: 2016 + A1: 2018 - such as EN 16523-1: 2015 + A1: 2018 to determine the resistance to the permeation of chemicals. The results of this test determine the relevant pictogram symbols that can be used on the packaging and labeling.

The glass fork symbol guarantees that products have been tested in accordance with European legislation and approved for food contact. The symbol is mandatory on products used for food contact.

The product does not contain latex.

The glove has a finger textured surface.

The glove has a high grip.

The glove is 300 mm long.

The standard specifies the requirements for protective gloves against chemicals and microorganisms. Type B has been tested for a permeation time of at least 30 minutes with the chemicals sodium hydroxide 40%, hydrogen peroxide 30% and formaldehyde 37%.

The standard specifies the requirements for protective gloves against hazardous chemicals and microorganisms. This part of the standard describes the glove's resistance to bacteria and fungi, but to viruses.

The standard specifies a method for testing gloves to determine whether the glove provides resistance to the permeation of chemicals and/or microorganisms. The test consists of an air and water test to identify leaks in the glove. They follow the ISO 2859 sampling plan. Not all gloves can be tested with air. In this case a water test is used.

**EN 420**

The standard specifies the requirements for protective gloves in relation to general requirements and test methods.
