Briefs, ABENA Slip Premium, L5, Green colour code

- ✓ Breathable backsheet, that contributes to healthy skin
- ✓ Effective core with Top-Dry technology ensures dry surface and protects skin
- ✓ Leakage barriers for extra protection
- ✓ Extra high absorbency
- ✓ Wetness indicator with graduation scale
- ✓ Odour Control minimises unpleasant odours
- ✓ Dermatologically tested

MD CE UKCA

Product Description

ABENA Slip is our Premium range of fully breathable, anatomically shaped bladder protection briefs developed for use with moderate to very severe incontinence. The efficient core with Top-Dry technology ensures fast absorption and a dry surface, even after repeated urination. This Slip model has extra high absorption and is equipped with standing leakage barriers for extra protection. The combination of breathability, Top-Dry and leakage barriers helps to protect the skin and maintain a natural skin balance. The Odour Control system minimises unpleasant smells. Combi tapes on the sides ensure an optimal fit and easy repositioning. The wetness indicator with graduation scale helps guide the user and caretaker to the right absorption level and aids product changes.

Specifications

Base name	Briefs
Brand	ABENA
Sub-Brand	Slip Premium
Size	L5
Colour	White
Features	Green colour code
Material	Combi tapes, breathable textile backsheet (BTBS), elastane, fluff, nonwoven, PP, resin, SAP
Length/depth	990 mm
Width	800 mm
Hip size	100-150 cm
Tolerance	+/- 10%
Absorption Rothwell	5000 ml
Gender	Unisex
Certificates	MD. UKCA. CE.
CE Class (Medical Devices)	Class I
Product or test standards	ISO 13485, ISO 11948-1
Directives, regulations and acts	MDR (EU) 2017/745

Instructions for use/application

Bladder protection briefs for moderate to very severe incontinence designed for highly demanding situations and for bedridden patients. Product size recognition based on colour codes, names and numbering systems. It is important to always measure the hip size to select the right size and to choose the correct absorption level to avoid leakages. Fold the brief lengthwise with the back sheet facing outwards to create a bowl shape. Pass the brief from front to back. Fan out the front of the brief, creating a channel shape between the legs. Fix the bottom tapes angled slightly upwards on both sides and then attach the top tapes angled downwards for a secure and comfortable fit. The product can be applied in an upright position (both self-managed or assisted) or in a lying position. See our application guide for more information.

MD

Regulation (EU) 2017/745 is a regulation of the European Union on the clinical investigation and sale of medical devices for human use. It repeals Directive 93/42/EEC, which concerns medical devices, and Directive 90/385/EEC, which concerns active implantable medical devices, on 26 May 2021.

CE

The CE mark guarantees that a product is safe to use and complies with all safety precautions. CE stands for Conformité Européenne (European Conformity) and is mainly found on electronic equipment, safety equipment, construction products and medical equipment.

UKCA

The UKCA mark guarantees that a product is safe to use and complies with all safety precautions in line with product standards and legislation of the UK.

Your guarantee that our products have been tested for ingredients which can potentially cause skin irritation. Tests conducted by an independent third-party laboratory.

Odor control is a critical factor in ensuring discreteness for the user. ABENA's incontinence products are designed and engineered to ensure that minimal Odor arises from the product.

Effective leakage barriers, both visible and invisible and latex-free elastics ensure a snug fit, which reduces the risk of leakages.

The product is fully breathable for the comfort of the user; also during long-time use. Helps maintain skin integrity.

Wetness indicator is a liquid-sensitive strip that changes colour or fades out indicating when it is time to change the product.

A combination of 100% breathability, Top-Dry and leakage protection provides a dry surface and healthy skin even after multiple voids maintaining the skin's natural pH balance.

The bag is 30% PCR, which means made from plastic materials used by consumers. This will allow us to reduce our plastic waste and to help take care of the environment.

The product does not contain latex.

Unique Top-Dry Technology that provides a rapid absorption and ensures a dry surface even after multiple voids.

Drop system indicating absorption. The more drops, the higher the absorption. Ranges from 1 to 10 drops.
