- ✓ Ideal solution for cleansing without water and soap
- ✓ Can be heated for extra comfort

Product Description

ABENA's Wet Wash Gloves for personal hygiene are a good alternative to the traditional bath with soap and water as they do not require rinsing. One pack is sufficient for a full-body cleansing. The material is soft and comfortable, making it particularly suitable for cleansing exposed and delicate areas. It contains the ideal amount of soap and water, which makes it suitable for sensitive skin. Also, you have less friction since no towel is needed. ABENA's Wet Wash Gloves have hydrating and protective properties. It can be used as it is, or the unopened package can be heated in the microwave for added comfort. The embossed surface of the gloves makes removing impurities and bacteria from the skin easier. It is a moist, two-sided wet wash gloves that can be used on the front and back. The wet wash gloves offer a complete grip and control of the clean and unclean side while cleaning the patient. Turning sides of the product using the same hand without necessarily using or contaminating the other hand is possible. Recommended for use in various situations like incontinence care, in the gym or on a camping holiday when there are limited opportunities for a full bath.
