- ✓ Cotton-based soft, breathable fixation pants with legs that leave the user dry and comfortable
- ✓ No seams, preventing pressure marks and skin irritation
- ✓ Leak prevention provided by elastic knitted construction
- ✓ Underwear-like design for increased discretion
- ✓ Easy product identification with colour coding, washing instructions and material composition"

Product Description

ABENA Fix Pants Cotton is an elastic breathable fixation pant with legs, made mainly from cotton. Cotton is a breathable and soft material that allows moisture to leave the skin, so the user feels dry and comfortable at all times. The pants look like normal underwear. The elastic material and knitting construction hold the pad tight to the body and thus ensure high security against leakage. It offers optimal performance for all activity and mobility levels. The seamless knit technology – an innovative concept in producing clothing almost free of seams – prevents pressure marks and skin irritation. The products can be washed up to 100 times, and therefore have a high cost-effectiveness and long life. ABENA Fix Pants Cotton offer easy product recognition thanks to the colour code both on the packaging and on the inside of the waistband, providing information about product name, size, washing instructions and material composition. Made of 80% cotton, 14% polyamide and 6% elastane.
