Product Description

Make everyday life easier with the ABENA Care-Ness Excellent Minus towel roll. This 1-ply roll is made from virgin fibre, ensuring both strength and cost-effectiveness. Perfect for use in auto-cut dispensers, it is ideal for both residential and professional environments. The product is food safe, making it safe in the kitchen. ABENA Care-Ness Excellent Minus is a series of paper products with the same high standard and quality as the other products in the Excellent series. The towel roll itself is made using recycled steam from the materials' extraction process and solar energy for electricity in production. According to the ISO standard 14067, this means that the actual manufacturing process of the towel roll takes place without CO2 emissions. When the paper in this towel roll is produced in a CO2-neutral production according to the ISO standard 14067, it does not mean that the product is CO2-neutral, but that the manufacturing process takes place without emissions and that this is certified through the recognised ISO certification. A process the manufacturer has worked hard on for more than 10 years to achieve. The towel roll is also a hygienic alternative to hand dryers, among other things. Our towel roll is made of virgin fibre, which, together with the smooth surface and the special embossing, provides an effective wiping paper with extra good absorbency. The Care-Ness Excellent Minus towel roll is also certified with both FSC™ (Forest Stewardship Council) and the EU Ecolabel.

FSC™ (Forest Stewardship Council) is an international non-governmental organization dedicated to the promotion of responsible forest management worldwide. FSC™-certified products are made from raw materials from well-managed forests and responsible sources. The label's traceability and integrity are upheld through stringent control measures, and by choosing FSC™-certified products, you help take care of forests and the people and wildlife that call them home. FSC™ Mix means the product consists of a blend of FSC certified wood and recycled materials. For more information, go to www.fsc.org.

The glass fork symbol guarantees that products have been tested in accordance with European legislation and approved for food contact. The symbol is mandatory on products used for food contact.

POGI (Partnership for Public Green Procurement) is a community of municipalities, regions and public organizations. The purpose is to make it easier for the public sector to buy environmentally-friendly products.

The EU Ecolabel, also known as the EU Flower, is the official environmental label in Europe. Products with the EU Ecolabel meet stringent environmental requirements with regard to raw material production, use, documentation and safety.
