- ✓ Skin-friendly
- ✓ bacterial and virus-proof
- ✓ Waterproof

Product Description

Film dressing with wound pad is a soft and comfortable thin sterile semi-permeable polyurethane film for wounds with low secretion. The film layer causes fluid from the wound to evaporate, therefore reducing the risk of maceration during wound dressing. The bandage is bacterial and virus-proof and is also showerproof. The wound pad absorbs any fluid and prevents the bandage from sticking. The adhesive is skin-friendly and leaves no adhesive residues.
